

Hydrogen Fuel Cell Standards Delivery Database

Hydrogen Fuel Cell Portal Conference

Presented by

Bob Feghali

Vice President, Business Development and CIO

Agenda

- Database Overview
- Browse Standards by Subject
- Search for Standards
- Document Delivery

Database Overview

- Standards will be classified using the National Template
- Browsing and searching will be done against only the classified records
- Documents will be delivered electronically, when available, otherwise in hard copy

Browse by Subject

- Browsing will begin from the high-level categories
- Starting from a high-level category, users will drill down to lower levels and to individual document listings.
- Browse listings will be actively produced ensuring the user sees the most up-to-date listing of documents for any category.

Search for Standards

- Searches will be performed only against the sub-set of data categorized as being part of the hydrogen fuel cell collection.
- Searches can be done against document numbers, title words, template categories, and the full record, including the abstract (where present).
- Search results will be ordered by developing organization, and then by document number.

Document Delivery

- Documents will be delivered electronically when possible.
- Documents can be purchased in several ways:
 - “By the drink” (pay as you go)
 - Subscription
 - Site license
- When documents cannot be delivered electronically, hard copy ordering information will be provided.
